

STAIRWELL ACCESS UNIT

Stairwell Access Unit

For safe access on both industrial and domestic stairwells.

The basic stairwell pack provides a platform level of 2.7m from the lowest step.

The unit is 0.7m wide, and features special narrow base plates, adjustable legs and non-slip platform boards.

Easy access from both sides of the stairwell unit to the platform is provided by a walk through ladder frame. Simply walk through the frame and climb the ladder.

This frame design solves the access problems experienced on narrow and domestic staircases.

Integrated access frame so access on the staircase can still be obtained.

Optional Extra's Include:

- Extension pack to raise the platform level from 2.7m to 4.20m from the lowest step
- Aluminium Toeboard assembly
- Additional side props and stabilizers available for extra support on narrow applications
